

Plan for Future Document

Uncompleted user stories with ID and description.

- 3: As a user I want a folder for my completed entries so that I can keep track of what I have completed.
- 4: As a user I want to be able to have the option to share my bucket list with friends and other users of the application so that they can see my list.
- 6: As a user I want to be able to have the option to attach a picture with my entries so that I can have a visual representation of my entry.
- 7: As a user I want to be able to sort my entries based on priority so that I know which entries I would like to complete first.
- 8: As a user I want to be able to see the number of active entries in the bucket list so that I can see how many entries there are for me to complete.
- 9: As a user I want to be able to see the number of completed entries in the bucket list so that I can track my progress.
- 10: As a user I want to see popular entries from other users so that I can add these to my bucket list if I desire.
- 11: As a user I want the ability to set up a collaborative bucket list so that my friends or significant other can add things we wish to do together.
- 12: As a user I want to review how long it took me to complete the entry from the time I add it to when I check it off so that I can see how long it took me to complete the task.
- 13: As a user I want to be able to connect my account to other social media so that I can share my completed entries to other media platforms.
- 14: As a user I want to be able to set a profile picture so that I can stand out from other users.
- 15: As a user I want to be able to change privacy settings on my account so that I can change what entries are visible to everyone/friends/only me.

The plan for future development of the remaining tasks listed above.

Our plan to complete these remaining tasks would be to continue having sprints where we plan the implementation of new features. We believe that a two sprints a week would be the most effective way to get these remaining tasks completed in a timely manner. We would continue to use GitHub for our version control and we would continue to use Discord for communication.
